

Expert Team on Climate Change Detection and Indices

- Joint CCI/CLIVAR/JCOMM
- Folland, Kent, Swail, Woodruff represent JCOMM
- Marine indices:
 - Large scale temperature averages
 - Pressure patterns (e.g. NAO)
 - Winds and waves
 - Ocean heat content
 - Sea level
- Links to land-based indices not always strong

Questions for ETMC

- Should the ETMC get involved in marine indices?
- Possible links on developing marine indices across JCOMM esp. Services Program Area?
- Should CLIMAR3 promote marine indices?
 - If so how?
