

Suggestion: An additional IMMT code entry to specify VOSCLim records

- ◆ Current version of IMMT does not provide an ensuring way to identify VOSCLim records.
- ◆ Looking into VOSCLim elements in the IMMT-2 and IMMT-3 records isn't ensuring because those elements are not always filled with values even if the platform is a VOSCLim ship.
- ◆ An additional code entry for the element 41 (observation platform), such as "A – VOSCLim ship", can be a solution. MQCS for the element 41 to be amended accordingly.
- ◆ Consideration is needed because introducing alphabetical character into element 41 may affect existing software.
