

Comprehensive Ocean-Atmosphere Data Set; Release 1  
**Supplement G: Box Maps and Landlocked File**

0. Introduction

The 10° and 2° box systems used in most of these data are defined and then illustrated on maps. The Marsden Square system and the approximate 2° landlocked file are also described. Refer to supp. H for a description of software tools available for use with 10° and 2° boxes, plus details on a machine-readable copy of the landlocked file and a program to read it.

1. 10° Boxes and Marsden Squares

The 10° box (BOX10) numbering system starts with the lower-left (SW) corner of BOX10-1 at 80° N, 30° E and proceeds east, spiraling down through each zone of latitude as follows (see also Figure G1-1):

|                        |    |    |     |    |    |     |     |
|------------------------|----|----|-----|----|----|-----|-----|
| BOX10                  | 1  | 2  | ... | 36 | 37 | ... | 648 |
| SW corner lat° (+N,-S) | 80 | 80 | ... | 80 | 70 | ... | -90 |
| SW corner lon° (+E)    | 30 | 40 | ... | 20 | 30 | ... | 20  |

The 30° division was chosen to avoid splitting any ocean; therefore, the BOX10s in a 10° latitude zone across any ocean are sequential. (The transformation  $k = 36 * (j - 1) + i$  can be used to convert the indices  $(i,j)$  of a matrix spanning longitude and latitude, e.g., the FORTRAN array dimensioned BOX10(36, 18), into a 10° box number  $k$  ranging from 1 through 648 as described above.)

Conventions a) and b) are the same as for Marsden Squares.

- a) The convention for inclusion of data that fall on the boundary of a BOX10 is dependent on the quadrant: the two inclusive boundaries are those that form the corner nearest the intersection of the equator and the prime meridian (0° N/0° E).
- b) However, when the observation falls along the equator or the great circle through the prime meridian (0° E or 180° E), the choice is made by the observer.

Conventions a') and b') are necessary to complete the system.

- a') Data at 90° N or 90° S exactly are assigned by convention to BOX10-1 or -648, respectively, and 1° Marsden Square 99 in both cases.
- b') In the event the observer's choice is not available, the BOX10 chosen (whether the choice is between two or four BOX10s) is that with the highest number.

The 10° Marsden Square (MSQ) numbering system is described here for reference (see also Figure G1-1). The system starts with the lower-right (SE) corner of square 1 at the equator and proceeds west from 0° longitude, spiraling up through each zone of latitude to 288 at 70° N, 10° E. Then following a gap in numbering from 289 through 299, it begins again just below the equator with square 300, and proceeds west from 0° longitude down through each zone of latitude to 623 at 90° S, 10° E. Finally, following yet another gap from 624 through 900, it begins again with squares 901 through 936 numbered westward from 0° longitude at 80° N latitude.

Each 10° Marsden Square can be further subdivided into 100 1° sub-squares, numbered 00 through 99 (1° box is synonymous with this 1° sub-square). After the global latitude and longitude are normalized such that  $-90^\circ \leq Yy \leq 90^\circ \text{N}$  and  $-180^\circ \leq XXx \leq 180^\circ \text{E}$ , the sub-square number is  $yx$ , i.e., concatenation of the units position of latitude and longitude. Exceptions are at 180° E, where  $yx$  must be set to  $y9$ , and 90° N or 90° S, where both the 10° and 1° Marsden Square are undefined.

## 2. 2° Boxes and Landlocked File

The 2° box (BOX2) numbering system starts with BOX2-1 at the North Pole and proceeds east from the prime meridian down through each zone of latitude to 16202 as given by the following:

BOX2-1 is reserved for data at 90° N exactly; thereafter,

|                        |    |    |     |     |     |     |       |
|------------------------|----|----|-----|-----|-----|-----|-------|
| BOX2                   | 2  | 3  | ... | 181 | 182 | ... | 16201 |
| SW corner lat° (+N,-S) | 88 | 88 | ... | 88  | 86  | ... | -90   |
| SW corner lon° (+E)    | 0  | 2  | ... | 358 | 0   | ... | 358   |

BOX2-16202 is reserved for data at 90° S exactly.

(The transformation  $k = 180 * (j - 1) + i + 1$  can be used to convert the indices  $(i,j)$  of a matrix spanning longitude and latitude, e.g., the FORTRAN array dimensioned BOX2(180,90), into a 2° box number  $k$  ranging from 2 through 16,201 as described above, exclusive of the two polar boxes.)

The convention for inclusion of data that fall on the boundary of a BOX2 is the same as that for a 10° box. Whether the choice of BOX10 for a report was made by the observer or assigned under convention b'), as discussed in sec. 1, it was given the number of the BOX2 enclosed by that BOX10.

Table G2-1 gives in 18 pages the latitude and longitude at the lower-left (SW) corner of each BOX2. The first nine of these (computer generated) pages cover the Northern Hemisphere working eastward from 0° E, and the last nine pages cover the Southern Hemisphere working eastward from 0° E. Each group of 25 (or in the two polar cases 26) BOX2s is delimited as a BOX10, and the BOX10 and MSQ numbers are given at its top. In addition, approximate land boundaries are marked with hand-drawn lines. The names of major land masses have also been marked.

These land boundaries were drawn using values derived from a modified version of the NCDC landlocked file, called LLN2F1, which is available in machine-readable form (see supp. H). The space following each BOX2 shows the specific value associated with it: a period  $< . >$  for land, an asterisk  $< * >$  for coastal (i.e., any mixture of land and sea), or a space  $< >$  for sea. In general, rivers and lakes are shown as land; thus all land  $< . >$  boxes form the group referred to as "landlocked" that was automatically trimmed.

|    |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |      |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |
