1961

Guide Book of the Japanese Marine Surface Data

**United States Weather Bureau
&
Japan Meteorological Agency**

1961

Contents

Contents

* Explanation of the micro-film	4
* Explanation of the punched-cards	5
Annex	
*List A : Converting table of the "Year" to the "Micro-film Serial Number"	7
* List B: Converting table of the "Serial Number" to the "Year" and "Ship Number"	9
*List C : Directory of ship name and number of log sheets from the "Ship Number"	11
*List D : Number of punched-cards corresponding the respec- tive "Ship Number"	38
*List E : Serial number of the hard box in which IBM cards and micro-films are contained	78

Explanation of the Micro-film

1. The following data are micro-filmed.
 - (a) Data of 1958, 1959, and 1960 which were submitted later.
 - (b) Data of 1961 submitted by the end of Sept. 1961 in which the data by June 1961 were recorded.
2. Details of the micro-films are as follows:-
 - (a) Ship numbers are, in principle, given in alphabetical order for each year.
 - (b) Ship numbers are consisted with five figures. The first two figures represent chronological year. (59 represent 1959). The succeeding three figures represent ship numbers of that year.

Example: 61001 means the 1st number ship of 1961.
 - (c) The ship numbers are micro-filmed on the first slide for each ship's data.

The numbers are also shown on the left corner of the each slide.
 - (d) Serial numbers are given on the micro-film. The numbers of this-year-photographed film start from No.008 after the serial numbers of the last-year-photographed film.
 - (e) The ship numbers of the micro-film are the same of the ship numbers of the punched cards.
3. The following materials are neither micro-filmed nor punched.
 - (a) Data of the Japanese Antarctic Whaling Fleets and the Japanese Antarctic Research Ship "Sōya".
 - (b) The ⁽¹⁹⁶¹⁾1961 data of the Japanese Ocean Weather Station "Tango".
4. All micro-films are put into cans and they are packed in hard paper boxes. Labels with serial numbers (such as No.009) and yearly film numbers such as 1961-1 are attached.

Explanation of the punched-cards

1. Card forms of the punched cards are divided into two forms, namely, Format 1 and Format 2.
(Refer the "Guide Book" of the preceeding year.)
2. Details of the punched cards are as follows:-
 - (a) The data of 1937 starts from Ship Number 37158 as a continuation of the work of the preceeding year.
 - (b) New ship numbers are given for the data submitted after Sept. 1960.
 - (c) For the data of 1961, the data obtained by the end of June 1961 are punched.
3. The following amount of cards is included in this year's work.

(a) FORMAT 1	1937 (remaining part)	148,243
	1936 (all)	218,562
	1935 "	214,441
	1934 "	215,035
	1933 "	200,548
	Total	996,829
(b) FORMAT 2	1958 (remaining part)	180
	1959 "	902
	1960 "	113,910
	1961 (a part)	89,800
	Total	204,793

Grand Total 1,201,622

4. Though several unreliable data are micro-filmed, but these are not punched.

Small part of data of Dec. (or Jan.) appeared on the log book of Jan. (or Dec.) are micro-filmed, but not punched because of troublesome technical difficulties.

5. All cards are put into small box containing 2,000 cards separately, and these 5 small boxes are put into larger hard box.

For example, Box No.1 contains small boxes of 1-1, 1-2, 1-3, 1-4 and 1-5 and these are the data of Ship No 37158 - 37191.
